## Education

**University of Arizona | Tucson, AZ** *May 2022*
Bachelor of Science in Computer Science, Minor in Biology

**Relevant Coursework:** Software Development • Object-Oriented Programming • Systems Programming & Unix • Web Programming • Data Structures & Algorithms • Computer Architecture • Database Design

## Skills

**Programming:** Python, Java, C, C#, HTML, CSS, SCSS, JavaScript, TypeScript, PHP, SQL, Shell Scripting
**Frameworks and Libraries:** Angular, .NET, Bootstrap, Drupal, jQuery, openpyxl, matplotlib, numpy
**Platforms:** Linux (Ubuntu, Debian, Raspberry Pi OS, Mint), Windows
**Certifications:** ISACA Cybersecurity Fundamentals Certificate
**Software:** VS Code, Visual Studio, GitHub, Apache, Eclipse
**Languages:** English (native), Bengali (native), French (beginner)

## Experience

**Athena | Fremont, CA** *May 2018 – November 2018*
***Full Stack Developer***
*Athena builds workflow optimization software for hardware manufacturing companies.*

- Worked with a team to build an intranet portal web application for a client that would allow them track the status of their projects and manufacturing processes
- Built interactive web pages with HTML, SCSS, Bootstrap, TypeScript, and Angular that would accept user input and display data on the current status of projects and workflows
- Used LINQ and C# in ASP.NET core to query the database for information requested by the front end
- Created Statistical Process Control software that allowed the client to analyze and improve workflows

**Miasolé | Santa Clara, CA** *June 2015 – August 2015*
***Technical Writer***
*Miasole is a solar cell manufacturer based in Santa Clara, California.*

- Used HTML and CSS to help build an informative company website with an appealing visual layout
- Created documents detailing work instructions for employees involved in solar cell production
- Created marketing brochures promoting company products

**Athena | Fremont, CA** *January 2013 – January 2014*
***Technical Writer***
*Athena builds workflow optimization software for hardware manufacturing companies.*

- Created marketing brochures promoting company products as well as documents detailing work instructions for employees
- Created help screens and online documentation for intranet websites

## Projects

**Reminder App**

- Built a desktop application in Java and JavaFX that allows users to schedule tasks and receive reminders
- Implemented a Model class to store tasks, a View class that created a GUI, and a Controller class

**Java Compiler**

- Built compiler in Java capable of parsing Java source code and producing assembly
- Program would perform lexical analysis of source code and then use recursive descent parsing to produce executable assembly instructions
